Download

I think the cause is a file in my.autocad directory. The file is named sheeting.txt, it contains a list of sheet properties. If I erase this file everything runs fine again. It's not a big file, it contains only the text "ArchivEinsiehung.docx": "Verbeiht text 'ArchivEinsiehung.docx'. Trotzdem kann das Modul 'ArchivEinsiehung' nicht starten. Bitte überprüfen Sie die Archivgruppen, auf denen das Modul 'ArchivEinsiehung' erstellt wurde." ("ArchivEinsiehung.docx" is German for "Archive Invoice"). What does this message mean? Should I delete that file? Thanks for your help. July 9, 2017 - Resolved: Hello, I've been using AutoCAD LT 2014 on my Windows 8.1 Pro PC for years without problems. AutoCAD crashes every time lately. I think the cause is a file in my.autocad directory. The file is named sheeting.txt, it contains a list of sheet properties. If I erase this file everything runs fine again. It's not a big file, it contains only the text "ArchivEinsiehung.docx": "Verbeiht text

'ArchivEinsiehung.docx'. Trotzdem kann das Modul 'ArchivEinsiehung' nicht starten. Bitte überprüfen Sie die Archivgruppen, auf denen das Modul 'ArchivEinsiehung' erstellt wurde." ("ArchivEinsiehung.docx" is German for "Archive Invoice"). What does this message mean? Should I delete that file? Thanks for your help. 07-09-2017 12:06 PM - Rep: Teemu (ADMIN) Hi Teemu, Welcome to Autodesk.com forum. From my understanding, you have a config.ini file and a sheeting.txt file in your.autocad directory. I would start by looking at config.ini file for any occurrences of sheeting.txt. You can do this by opening config.ini in Notepad, opening Notepad as administrator 82157476af
